NATIONAL TEXTILE UNIVERSITY
Software Engineering

SKILLS

- ASP.NET Core
- C#
- C++
- SQL Server
- Html and Css
- Javascript
- React js
- Tailwind Css
- MongoDB
- Nodejs
- Express

LANGUAGES

- English (Fluent)
- Urdu (Fluent)

PROFILE

Motivated BS Software Engineering student (6th Semester) with practical experience in Full Stack .NET and MERN stack development. Proficient in ASP.NET Core, C#, React, Node.js, and MongoDB, with additional expertise in workflow automation using n8n. Strong understanding of clean architecture, APIs, and database design.

WORK EXPERIENCE

Bookstore Web Application – MERN Stack

Technologies: MongoDB, Express.js, React.js, Node.js

Developed a full-stack bookstore application using MERN stack. Implemented user login and logout functionality. Applied protected routing in React for authenticated users. Integrated MongoDB for data storage and backend API development.

Blog Management System – ASP.NET Core MVC

Technologies: ASP.NET Core MVC, C#, SQL Server

Developed a dynamic blog website using ASP.NET Core MVC architecture. Implemented basic user authentication and authorization. Designed CRUD functionality for blog posts. Integrated database connectivity using Entity Framework.

Food Corner – Recipe Web Application

Technologies: ASP.NET Core Web API, MVC, JWT, Cookies, SQL Server

Built a full-stack recipe management system with separate User and Admin dashboards. Implemented secure authentication using JWT tokens and cookies. Developed role-based authorization and protected routes. Created RESTful APIs for managing recipes and users.
